

SEPARATING PEOPLE FROM HAZARDS

# Kee® Dome

- ACTIVE AND PASSIVE FALL PROTECTION SYSTEMS AVAILABLE
- PERMANENT, TEMPORARY AND PORTABLE OPTIONS AVAILABLE
- INDEPENDENTLY TESTED, MEETS OR EXCEEDS SAFETY STANDARDS
- ALL SYSTEMS FEATURE EASY SETUP, LONG LASTING SOLUTIONS WITH MINIMAL MAINTENANCE

CSI 077200  
May 2014

Independently tested to  
**OSHA Standard 29 CFR 1910.23**  
**Ontario OHS Act**  
**Meets ANSI & CSA Standards**

skylight guard rail system,  
fits skylights, roof lights, and  
dome lights with curbs

## The Safety Solution for Skylights

Our freestanding KEE DOME system does not penetrate the roof membrane. The heavy duty rubber base keeps the safety railing in place. KEE DOME uses industry leading KEE KLAMP components which are galvanized, making the system long lasting and virtually maintenance free. KEE DOME has been independently tested to OSHA Standard 29 CFR 1910.23.

### Skylight Fall Protection

- Constructed of rigid galvanized pipe
- Does not block light
- Simple customization

**Fig. 1**

Kee Dome is 8' x8' model shown

**Fig. 2**

A clamping ring is inserted into the base unit to lock the upright

### Configuration

KEE DOME includes upright posts, horizontal rails, and specialized corner connectors or "feet" made of recycled PVC. The upright posts are locked into position within the base units using clamping rings. The resulting structure is safety compliant, remains completely free-standing, and eliminates the risk of damage to the roof membrane.

### Installation

Using standard tools, two workers can install a 8'X 8' KEE DOME in an hour. KEE DOME can be adapted to inclined roofs up to 5 degrees. When installing KEE DOME, all set screws should be tightened to 29 lbs/ft.
